/JULIANGRAY

Fusing together a rare blend progressive house, techno, and electro, Julian Gray carves out his own genre his fans have deemed as “**progresso.**” His one of a kind style of playful, melancholic music personally captured **Deadmau5’s** attention early in his career, leading to several releases with the artist's esteemed **mau5trap** label. From an early age, Julian learned the fundamentals of music theory that would pose the basic framework for his later work, strengthened by 8 years of classical training through his adolescence. Growing up in a musical family around a wide variety of music genres including 80s new wave and electronica instilled a lasting sense of eclecticism still apparent in his productions today.
